In the course of protests, all kinds of spaces – such as homes, corporate offices, streets and factories – are used, occupied, defended and abandoned. Particular places provide protestors with opportunities and constraints as they wage their struggles. Places can influence the character of protests as well as being transformed by them. Protestors make space, and in so doing they can imbue places with different meanings and feelings. In short, protest always has a geographical character and this has implications for the emergence, character, impact and outcomes of particular struggles. Protests form part of a broader

The Swarm versus the Grassroots: places and networks of supporters and opponents of Black Lives Matter on Twitter
Social movement studies

NY ARTIKKEL - ERSTATTER
TIDLIGERE ARTIKKEL OM
DIGITAL MOBILISERING
UNDER DEN ARABISKE
VÅREN

Forfatter: van Haperen, Sander ; Uitermark, Justus ; Nicholls, Walter **Type:** Artikkel **ISSN:** 14742837 **Utgiver:**
Routledge **Utgivelsessted:** ABINGDON **Utgivelsesår:** 2023-03-04 **Totalt antall sider:** 171-189 **Sider:** 171-189
Årgang/Volum: 22 **Hefte:** 2 **DOI:** 10.1080/14742837.2022.2031954 **Noter:** While activists have effectively used
the #blacklivesmatter hashtag to organize protests against police brutality and racism, this success has also
drawn out many who use the hashtag to express their opposition. How do supporters of the Movement for Black
Lives and their opponents coordinate on Twitter? Drawing on a corpus of 18.5 million tweets, this paper compares
coordination among supporters and opponents of #blacklivesmatter in terms of relations and spatialities. We
elaborate two different models of coordination: the swarm and the grassroots. Compared to their adversaries,
supporters of #blacklivesmatter are more strongly rooted in places and embedded in local relations, suggesting
that their online activism builds on grassroots communities. Opponents can be differentiated into two categories.
One group consists of conservatives that are rooted in places but in a markedly different geography than
supporters; they are more often located outside of major cities and outside of the coastal states. A second group

of digitally networked extreme right opponents coordinates more in the fashion of a swarm: they synchronize without being rooted in places or embedded in local relations. These findings demonstrate that movements and countermovements benefit from the affordances of social media in different ways.

5: Contentious politics and spatiality

NY FORELESNING - DEKKER CONTENTIOUS POLITICS OG EMPIRISKE ARTIKLER SOM BRUKER BEGREPET. INKLUDERER REFERANSER FRA GEOGRAFER

Contentious Politics

Type: Bokkapittel **Kapitelforfatter:** Tarrow, Sidney **Boktittel:** The Oxford Handbook of Social Movements

ISBN: 9780199678402 **Utgiver:** Oxford University Press **Utgivelsesår:** 2015-11-01 **Redaktør:** della Porta,

Donatella ; Diani, Mario **DOI:** 10.1093/oxfordhb/9780199678402.013.8 **Noter:** Over the past decade and more, students of social movements have begun to employ the concept of “contentious politics.” Coined by the late Charles Tilly in a series of works he began in the 1970s, the concept encompasses social movements but extends to a wider range of conflictual phenomena, including strike waves, civil wars, revolutions, and insurgencies. It shifts the focus from the subjects and objects of contention to the mechanisms that connect them to each other and to broader institutions and actors. Much questioned when it emerged, the contentious politics approach has ripened to influence work on intra-movement relations, on links between movements and parties, the radicalization of movements, civil war mechanisms, and escalation into revolutionary situations. This chapter introduces the approach, sketches some of its problems, touches on five areas of research it has influenced, and proposes four areas to which it can propose solutions.

[Lenke \(bibsys-k.alma.exlibrisgroup.com\)](https://bibsys-k.alma.exlibrisgroup.com)

Space And Contentious Politics

Mobilization (San Diego, Calif.)

Forfatter: Martin, Deborah G ; Miller, Byron **Type:** Artikkel **ISSN:** 1086671X **Utgivelsesår:** 2003-06-01 **Totalt**

antall sider: 143-156 **Sider:** 143-156 **Årgang/Volum:** 8 **Hefte:** 2 **DOI:** 10.17813/maiq.8.2.m886w54361j81261

Noter: Drawing on the work of McAdam, Tarrow, & Tilly, Lefebvre, & others, we argue that analysis of political contention dynamics can benefit from attention to the spatial constitution & context of social, political, & economic processes, & the ways in which these processes are spatially experienced & contested. We contend that spatial processes are inseparable from, & constitutive of, social processes. Starting from the central geographic concepts

of space, place, & scale, we discuss how a spatial perspective can produce more illuminating understandings of how people perceive, shape, & act upon grievances & opportunities. We demonstrate the utility of a spatial perspective through an examination of ways in which space is implicated in the operation of several mechanisms identified by McAdam, Tarrow, & Tilly. Finally, we introduce the papers included in this special issue on space & contentious politics, discussing the ways in which each author finds place, space, & scale to be bound up in the dynamics of political contention. 51 References. Adapted from the source document.

CONTENTIOUS POLITICS OF SLUMS: Understanding Different Outcomes of Community

Resistance against Evictions in Rio de Janeiro

International journal of urban and regional research

Forfatter: Sørbøe, Celina Myrann ; Braathen, Einar **Type:** Artikkel **ISSN:** 03091317 **Utgiver:** John Wiley & Sons, Ltd **Utgivelsessted:** Chichester, UK **Utgivelsesår:** 2022-05 **Totalt antall sider:** 405-423 **Sider:** 405-423

Årgang/Volum: 46 **Hefte:** 3 **DOI:** 10.1111/1468-2427.13082 **Noter:** Between 2010 and 2016, over 65,000 slum dwellers were forcibly evicted in Rio de Janeiro. This article compares three cases of anti-eviction resistance over this period.

While the three case study communities were all relatively successful in contesting evictions, the outcomes (material, social, political-symbolic) of their mobilizations were different. To understand how and why, we examine and compare the structures and processes of mobilization in these three communities and show how they found different openings and limitations in the changing political opportunity structure. We distinguish three distinct 'moments' or opportunity structures in Rio de Janeiro's urban governance between 2010 and 2016. We term these the City of Exception, the City in Revolt and the City in Crisis. The analytical and theoretical framework of contentious politics helps us draw together and expand on two dominant narratives in scholars' approach to slum evictions: on the one hand a top-down perspective of the 'city against slum dwellers'; on the other a bottom-up perspective of 'slum dwellers against the city'. In this article we test the usefulness of our expanded framework—contentious politics of slums—for understanding the organization and outcomes of community resistance against evictions, and discuss its relevance for research on the politics of slums in the global South.

Theorising approaches to social movement spatialities: Local and global contestations of neoliberal water services

Transactions - Institute of British Geographers (1965)

Forfatter: Magdahl, Jørgen Eiken **Type:** Artikkel **ISSN:** 00202754 **Utgiver:** Wiley **Utgivelsessted:** HOBOKEN
Utgivelsesår: 2022-12 **Totalt antall sider:** 1028-1043 **Sider:** 1028-1043 **Årgang/Volum:** 47 **Hefte:** 4 **DOI:** 10.1111/tran.12550 **Noter:** This paper examines different ways of studying – and thereby understanding – social movement spatialities. For more than a decade, literature on the geographies of social movements has explored the multiple spatialities of mobilisation, using concepts like scale, network, place, and territory. Drawing on existing contributions, the study provides a critical engagement that differentiates between several forms of research agendas involving contrasting epistemologies. This engagement contributes to opening up a conceptualisation of multiple analytical approaches by (1) analysing wider processes and political goals spanning different movements, characterised as 'crosscutting spatialities'; (2) studying the more specific and diverse spatiotemporal realities within particular movement cases, which describe their 'complexsituated spatialities'; and (3) considering how inherent tensions arise between the different political practices of specific movements, displaying 'contradictory spatialities'. The reading of these approaches is framed within a relational perspective that employs them in an empirical study of local and global struggles against neoliberalised urban water services. The paper explores the spatial practices of an urban placebased movement struggle in Johannesburg and a global labour union federation for public service workers – representing two vantage points in the fight for water justice and the human right to essential services. The study demonstrates how the analytical approaches inform one another through complementary but also contrasting perspectives on movement politics. This paper examines different ways of studying and thereby understanding social movement spatialities. These approaches are furthermore framed within a relational perspective by employing them in an empirical study of local and global struggles against neoliberalised urban water services. The study demonstrates how the analytical approaches inform one another through complementary but also contrasting perspectives on movement politics.

Spreading from the USA, demonstrations diffused globally, especially to Europe, calling out racism in its different forms. Emotions ran high and were pivotal in igniting protests. The role of emotion in social movements has received renewed scholarly attention during the last decades. It plays an important role at every stage of protest, but few studies have traced its part in individuals shifting engagement over time. This study examines the role of emotion during the global wave of Black Lives

Matter protests. Based on retrospective interviews with 38 participants in Black Lives Matter demonstrations in Norway, we identify the role of emotion before, during and after their participation. Our findings help explain how individual patterns of participation develop in the course of a wave of protest, and also provide insights into the consequences of the recent Black Lives Matter protests in Europe.

[New kids on the block: taking stock of the recent cycle of climate activism](#)

[Social movement studies](#)

Forfatter: de Moor, Joost ; De Vydt, Michiel ; Uba, Katrin ; Wahlström, Mattias **Type:** Artikkel **ISSN:** 14742837 **Utgiver:** Routledge **Utgivelsessted:** ABINGDON **Utgivelsesår:** 2021-09-03 **Totalt antall sider:** 619-625 **Sider:** 619-625 **Årgang/Volum:** 20 **Hefte:** 5 **DOI:** 10.1080/14742837.2020.1836617 **Noter:** Since late 2018, a global wave of mobilization under the banners of Fridays For Future (FFF) and Extinction Rebellion (XR) has injected new energy into global climate politics. FFF and XR took the world by storm, but have now been forced into (partial) latency as a result of the Covid-19 pandemic. We believe this moment presents an opportunity for reflection. In particular, FFF and XR have been depicted as 'new' forms of climate activism. However, we argue

that the extent to which these campaigns represent 'new' forms of climate activism is really a matter for closer investigation. In this Profile, we therefore reflect on the distinctiveness of the 'new climate activism' as compared to previous climate campaigns. Reviewing previous studies and our own research, we find that there are both elements of change and continuity in who participates and how, and that the main change appears to be the use of a more politically 'neutral' framing of climate change that is directed more strongly at state than non-state actors.

Climate Justice: The Emerging Movement against Green Capitalism

The South Atlantic quarterly

Forfatter: Dawson, Ashley **Type:** Artikkel **ISSN:** 00382876 **Utgiver:** Duke University Press **Utgivelsessted:**

DURHAM **Utgivelsesår:** 2010 **Totalt antall sider:** 313-338 **Sider:** 313-338 **Årgang/Volum:** 109 **Hefte:** 2 **DOI:**

10.1215/00382876-2009-036 **Noter:** As the severity of the unfolding global climate crisis has become increasingly apparent over the last decade, a movement for climate justice has emerged to challenge unsustainable environmental policies pursued in the United States and around the world. The U.S. wing of this movement builds on the environmental justice movement and its challenges to mainstream environmental organizations around a civil rights agenda of ecological equity for all. The devastation wrought by Hurricane Katrina in New Orleans has played a particularly important role in catalyzing the movement for climate justice. This devastation was not, I argue, simply a product of a natural disaster: instead, shortsighted, corrupt, and racist policies in New Orleans prepared the terrain for the suffering that followed the storm. The still-unfolding tragedy in New Orleans thus demonstrates the extent to which human intervention in the environment has placed the most vulnerable in harm's way. After discussing the iniquities of the reconstruction efforts in New Orleans, I outline the history of the environmental justice movement, looking in particular at two organizations-WEACT of Harlem and Sustainable South Bronx-that are working to link local environmental injustices to global issues of climate change. These organizations are at the forefront of the opposition to false solutions to climate change, such as carbon offsetting and pollution trading. Their work as grassroots organizations with increasingly extensive transnational links places them in a pivotal position to advance key models of ecological equity.

[Recommended reading: Toward a postapocalyptic environmentalism? Responses to loss and visions of the future in climate activism.](#)

[Environment and planning. E, Nature and space \(Print\)](#)

Forfatter: Cassegard, Carl ; Thorn, Hakan **Type:** Artikkel **ISSN:** 25148486 **Utgiver:** SAGE Publications

Utgivelsessted: London, England **Utgivelsesår:** 2018-12 **Totalt antall sider:** 561-578 **Sider:** 561-578

Årgang/Volum: 1 **Hefte:** 4 **DOI:** 10.1177/2514848618793331 **Noter:** The environmental movement has stood out compared to other movements through its future-oriented pessimism: dreams of a better or utopian future have been less important as a mobilizing tool than fear of future catastrophes. Apocalyptic images of future catastrophes still dominate much of environmentalist discourse. Melting polar caps, draughts, hurricanes, floods, and growing chaos are regularly invoked by activists as well as establishment figures. This apocalyptic discourse has, however, also been challenged not only by a future-oriented optimism gaining ground among established environmental organizations, but also by the rise of what we call a postapocalyptic environmentalism based on the experience of irreversible or unavoidable loss. This discourse, often referring to the Global South, where communities are destroyed and populations displaced because of environmental destruction, is neither nourished by a strong sense of hope, nor of a future disaster, but a sense that the catastrophe is already ongoing. Taking our point of departure in the environmentalist classics by Rachel Carson and Barry Commoner, we delineate the contours of apocalyptic discourses in environmentalism and discuss how disillusionment with the institutions of climate governance has fed into increasing criticism of the apocalyptic imagery. We then turn to exploring the notion of postapocalyptic politics by focusing on how postapocalyptic narratives including the utopias they bring into play, their relation to timespace, and how they construct collective identity are deployed in political mobilizations. We focus on two cases of climate activism: the Dark Mountain project and the International Tribunal

for the Rights of Nature and argue that mobilizations based on accepting loss are possible through what we call the paradox of hope and the paradox of justice.

[Ecological economics](#)

Forfatter: Anguelovski, Isabelle ; Martínez Alier, Joan **Type:** Artikkel **ISSN:** 09218009 **Utgiver:** Elsevier B.V

Utgivelsessted: AMSTERDAM **Utgivelsesår:** 2014-06 **Totalt antall sider:** 167-176 **Sider:** 167-176

Årgang/Volum: 102 **DOI:** 10.1016/j.ecolecon.2014.04.005 **Noter:** In 2002, the year it was published, *The Environmentalism of the Poor* was one of the first books examining in a multidisciplinary perspective three parallel environmental movements around the world. Eleven years later, we re-examine these movements: the Cult of Wilderness, the Gospel of Eco-Efficiency and the Mantra of Environmental Justice, focusing on the increased visibility of struggles representing Environmental Justice and *The Environmentalism of the Poor*. Even if they are often disconnected from an organizational standpoint, glocal manifestations of resistance have emerged since the 1990s. Today, environmental movements assert common values related to place, identity, and culture. Activists' concepts such as ecological debt, environmental justice, environmental liabilities, land grabbing, environmental gentrification, corporate accountability, climate justice, food sovereignty, or economic degrowth are the keywords of the networks of the global Environmental Justice movement. At the same time, such concepts support the rural and urban movements that remake place for marginalized groups, re-assert traditional practices, and protect territory from contamination, land appropriation, and real estate speculation. Some possibilities exist for cooperation between Environmental Justice and the other varieties of environmentalism. Here, comparative research can help unravel the use of valuation languages different from green economic growth or sustainable development.

Utgivelsesår: 2018-09-02 **Totalt antall sider:** 315-328 **Sider:** 315-328 **Årgang/Volum:** 10 **Hefte:** 3 **DOI:**

10.1080/21681392.2019.1610008 **Noter:** Pride parades can be understood as the stage where identity politics is performed [De Waal, S., and A. Manion, eds. 2006. PRIDE: Protest and Celebration. University of the Witwatersrand, GALA]. [Johnston, L. 2007. "Mobilizing Pride/Shame: Lesbians, Tourism and Parades." Social & Cultural Geography 8 (1): 29-45] argues, 'Pride parades are visible expressions of collectivities which may homogenize experience and exclude those who do not conform to norms'. Thus, Pride has the potential of being a queer platform, in the way that [Warner, M., ed. 1993. Fear of a Queer Planet: Queer Politics and Social Theory. Minneapolis: University of Minnesota Press] sees queer as being in opposition to 'regimes of the normal'. While Pride is closely associated with gay culture since the 1960s, it is not without contestation even among lesbian, gay, bisexual, transgender and queer people. This paper aims to unpack contestations within Pride in two cities in South Africa, highlighting in particular the ways class, race, space and gender disrupt LGBTQ identifications, organizing and notions of belonging. Using the frame of *ihlazo*, a notion that includes, inter alia, shame, embarrassment and disgrace, the paper exposes the racial and class collusions that compromise gay and lesbian groups in post-apartheid South Africa.

724-751 **Sider:** 724-751 **Årgang/Volum:** 71 **Hefte:** 5 **DOI:** 10.1177/000312240607100502 **Noter:** This article examines why the Stonewall riots became central to gay collective memory while other events did not. It does so through a comparative-historical analysis of Stonewall and four events similar to it that occurred in San Francisco, Los Angeles, and New York in the 1960s. The Stonewall riots were remembered because they were the first to meet two conditions: activists considered the event commemorable and had the mnemonic capacity to create a commemorative vehicle. That this conjuncture occurred in New York in 1969, and not earlier or elsewhere, was a result of complex political developments that converged in this time and place. The success of the national commemorative ritual planned by New York activists depended on its resonance, not only in New York but also in other U.S. cities. Gay community members found Stonewall commemorable and the proposed parade an appealing form for commemoration. The parade was amenable to institutionalization, leading it to survive over time and spread around the world. The Stonewall story is thus an achievement of gay liberation rather than an account of its origins.

Visibility in Global Queer Politics

Type: Bokkapittel **Kapitelforfatter:** Edenberg, Emil **Boktittel:** The Oxford Handbook of Global LGBT and Sexual Diversity Politics **ISBN:** 9780190673741 **Utgiver:** Oxford University Press **Utgivelsesår:** 2020-05-07 **Redaktør:** Rahman, Momin ; McEvoy, Sandra M ; Bosia, Michael J **DOI:** 10.1093/oxfordhb/9780190673741.013.34 **Noter:** This chapter discusses the notion of visibility and its place in the politics of queer oppression and queer liberation. In theory as well as activism, visibility is often considered necessary for the advancement of LGBT rights. However, some researchers challenge the reliance on visibility in queer politics, arguing that visibility may be related to control, normalization, increased violence, and backlashes; may contain biases with regard to race, class, and gender; and may rest on Eurocentric assumptions. Queer visibility has varied meanings and effects both in different national contexts and in international political arenas, ranging from instrumentalization of pro- or anti-LGBT discourses to the invocation of hypervisibilized “queer folk devils.” Moreover, discourses of queer invisibility may legitimize certain forms of politics. An approach to visibility is proposed that focuses on regimes of visibility, their multiple and differentiated effects, and the possibilities of resistance, highlighting the relation between queer visibility and community formation.

12: Democratization movements against autocratization

DELVIS NYTT PENSUM -
OPPDATERT

Authoritarian power in space, time and exile

Political geography

Forfatter: Conduit, Dara **Type:** Artikkel **ISSN:** 09626298 **Utgiver:** Elsevier Ltd **Utgivelsessted:** OXFORD **Utgivelsesår:** 2020-10 **Totalt antall sider:** 102239- **Sider:** 102239- **Årgang/Volum:** 82 **DOI:**

10.1016/j.polgeo.2020.102239 **Noter:** Autocrats have been shown to exert influence over their populations and dissidents abroad through strategies such as 'transnational repression' or 'diaspora engagement' policies, demonstrating that authoritarian power carries across borders. But existing work on extra-territorial authoritarian power has tended to view state power as a stand-alone variable that endows regimes with a relatively free hand to make their own diaspora policies. This is despite that studies of authoritarianism inside states, including those observing the 'dynamics of contention,' have consistently highlighted the relational and contingent nature of authoritarian power. This paper asks whether the iterative dynamics of contention that describe regime-opposition relations within state boundaries endure between authoritarian regimes and their exiles? It brings together the literatures on extra-territorial authoritarian power and the topology of power with that on contentious politics in authoritarian regimes to undertake a case study on the relationship between the Syrian government and the exiled

Syrian Muslim Brotherhood. It finds that extra-territorial authoritarianism is relational and contingent on the political context and its recipients, and shares many of the characteristics of authoritarian power inside state boundaries.
