

Evaluation-form

Course-code: STV4447

Course title: The Politics of Education and Research Policies

Language:  Norwegian  English

Course convener's evaluation of the course:

The course worked really well. The students were engaged and the visit to the Ministry of Education for the presentation of policy briefs was a clear highlight. The biggest problem was the low number of students who signed up for the course

Summary of feedback from student contact-point:

The students were really happy and especially liked the visit to the ministry. The feedback was overall very good. More guidance on the literature was the only suggestion for improvement

Suggestions for improvements:

I will look into the framing / advertising of the course as well as the timing to see what can be improved to get more students to sign up for the course.
