Is there anything else that you would have wanted information on?

- Probably more useful to have this course in august
- "Get to know who the other phd-students are"-round.
- how the university can help with exchange and finance for doing a few months of the PhD abroad (it was covered very briefly though)
- No
- None, I think it was well organised.
- No

Other comments (e.g. on practical issues or suggestions for future courses)

- Most of the information overlapped with the information we have received at the department
- As an external candidate the 2 hours felt a bit UiO-internal
- It was nice as an official welcome to the phd program, but most of the information was already known to me.
- None.
- I think it's generally a bad idea to make attendance compulsory at meetings where you recite material we can reasonably be assumed to be familiar with (such as everything on SV PhD webpages). I therefore believe this course should not be mandatory in its current form. My unit already had an information meeting for all PhD students, so I got very little out of the faculty meeting.
