

Agreement of supervision Department of Social Anthropology

This agreement specifies the supervision between

Student:

Supervisor:

With regards to the master project:

Supervision between supervisor and student is regulated in *Ethical guidelines for supervisors at the University of Oslo*. The supervisor is expected to know these guidelines.

Scope and limitations

The scope of supervision is limited to a total of 12 sessions: 3 sessions while developing the project proposal in the first semester; 1 session before fieldwork during the second semester; 3 during the third semester and 5 in the fourth semester. Guidance that covers more than 50 pages of the student's work, will count as two sessions. Unused sessions cannot be transferred to a later semester. In total, the student is entitled to supervision during four active semesters, including the field work/data collecting period. If the student for a period of time does *not* want supervision, the department and the supervisor must be notified.

If the supervisor is unavailable for an extended period of time, the department will ensure that supervision is offered by another supervisor. Sessions already held are subtracted from the total amount of sessions in the case of change of supervisor.

Termination of the agreement

The agreement is terminated when one or more of the following situations occur:

- a) the student completes the final examination of the master degree,
- b) the student changes supervisor,
- c) the student has had the total amount of supervision meetings and/or four semesters,
- d) the admission to the master programme is revoked, or
- e) the student withdraws from the study programme.

Guidelines for supervision during the master programme, as well as information of rights and duties are available on the programme pages:

<https://www.sv.uio.no/english/studies/master/social-anthropology/index.html>

I hereby confirm to have read and understood the rights, duties and guidelines regarding supervision during the master programme in social anthropology.
